

Online Mathematics Help

Project Problem
2015 Math Contest
University of Houston

Directions

The goal of the team project is to build a website that can be used by high school mathematics students who need help with one or more high school mathematics courses, and then create a video tutorial demonstrating the use of your website. You can either zip the website and share it through a folder (using something like Google drive, Microsoft OneDrive, Dropbox, etc) or host your website using any of a number of different free online services (you can find one of these services by doing a web search). Your video should be uploaded to YouTube or some other streaming service, and be linked from the front page of your website.

Project solutions can be submitted by sending an email to jjmorgan@central.uh.edu by 9am on January 31st. Your email should include the name of the school, the name(s) of the team members, and instructions for accessing the website.

Please use the subject line TEAM PROJECT.

You can email questions and comments, prior to your submission, to jjmorgan@central.uh.edu. As above, use the subject line **TEAM PROJECT**.

Project Evaluation

Project submissions will be evaluated using the following criteria:

- Website design.
- Originality.
- Ease of navigation.
- Quality of help materials that are posted on the site or linked from the site.
- The quality of any help material created by the team.

Note: There is a tremendous amount of help material available online, and your website can link to this material. Moreover, it is expected that most of the help material will be the result of links of this type.
